Abstract (en)
[origin: WO2013139982A1] The invention concerns a ventilation device comprising a fan propeller (3) and a motor (5) with an external rotor (7b) for driving said propeller (3), said propeller (3) comprising a central hub (11) having a front wall (17) and an inner side wall (21) defining a reception housing for the external rotor (7b), and the external rotor (7b) having a front portion (9) and a side wall (9") arranged bearing against the inner side wall (21) of the central hub (11). According to the invention, said device further comprises means (27) for latching the external rotor (7b) to the central hub (11) carried by the central hub (11) and by the external rotor (7b).
