Abstract (en)

[origin: WO2013139463A1] Converter cell (1) with at least one particularly rechargeable electrode assembly (2) which is intended to make electrical energy available to a consumer, at least temporarily, which has at least two electrodes (3, 3a) of differing polarity, comprising at least one current conducting device (4, 4a), which is intended to be connected electrically, preferably by a material bond, to one of the electrodes (3, 3a) of the electrode assembly (2), comprising a cell housing (5) with a first housing part (6), wherein the first housing part (6) is intended to enclose the electrode assembly (2) at least in certain regions.
