Abstract (en)
[origin: DE102013012508B3] The container (1) has a rectangular base unit (2) with longitudinal side walls (5,6). The upper edge of side wall (6) is hinged at a frame (8). The sides of short side walls (9) are mounted in the side edges of a latch displaceable against the force of a spring. A cover-side head is provided with a closed lid (10) located at the cover nubs arranged under the lid, so as to push the latch with correct vertical list of the short side wall into a pocket which is provided at the end of a curved guide ramp. The depth of the pocket is approximate to the height of the lid.
