Abstract (en)
[origin: WO2013143747A1] The invention relates to an earth-coupling arrangement (12) for a vehicle (10), with an earth-receiving element (14) for receiving an earthing object (16), a guide arrangement (18) by means of which the earth-receiving element (14) is mounted movably relative to the vehicle (10), and with coupling means (20) which are designed to couple the earth-receiving element (14) to a vehicle structure connected fixedly to the vehicle (10) and/or at least partially to decouple said earth-receiving element from the vehicle structure, wherein the coupling means (20) have an actuator (22) which is designed to adjust the degree of the coupling and/or the temporal profile of the coupling.
