Abstract (en)
[origin: WO2013143965A2] The present invention relates to a core-sheath rope (1) comprising an outer sheath (3) in the form of a hollow braid, and an inner sheath (4) in the form of a hollow braid, wherein, at particular points (5, 6), thread changes between threads (41, 42) of the inner sheath (4) and threads (31, 32) of the outer sheath (3) and/or loopings between threads (41, 42) of the inner sheath (4) and threads (31, 32) of the outer sheath (3) are provided. The rope according to the invention is characterized in that bridge threads (51, 61) extending in the longitudinal direction of the rope are provided at the points of the thread changes and/or loopings, the threads, changing from the inside to the outside or from the outside to the inside, of the outer sheath or inner sheath being guided about said bridge threads (51, 61).
