Abstract (en)
[origin: WO2013143750A1] The present invention relates to an injection valve for the injection of fuel, comprising a fuel supply element (2) for the supply of the fuel, an electrical line (3) which runs at least partially parallel to the fuel supply element, and an injection-moulded encapsulation (4) which surrounds the fuel supply element (2) and the electrical line (3), wherein the injection-moulded encapsulation (4) comprises a longitudinal rib (5) which runs in an axial direction (X-X) of the injection valve and which is arranged on the injection valve opposite the electrical line (3).
