Abstract (en)

[origin: WO2013144003A1] The invention relates to adaptive spectacles (28) for the driver or passenger of a motor vehicle (20), said spectacles (28) including lenses comprising a screen having a transmission coefficient that varies between a maximum value (CTMAX) and a minimum value (CTmin). According to the invention, the transmission coefficient (CT) of the lenses of the spectacles (28) is controlled using a wireless communication protocol. The invention is intended for motor vehicle driving.
