Abstract (en)

[origin: US2015026906A1] A wire core brush with a core composed of at least two wires or wire legs twisted together, between which a large number of application elements composed of filament are held in a clamped fashion, each being embodied in the form of a loop whose ends are both affixed to the wire core, in which a large number of application elements that are each composed of a loop are composed of a single filament, which is clamped in one piece between the wires that are twisted together.
