Abstract (en)

[origin: CN104340446A] The invention relates to a labeling machine with redundant labeling units and especially relates to a labeling machine labeling a container, such as a bottle. The labeling machine with the redundant labeling units comprises a conveying line conveying a container, and at least one container station positioning the container, wherein the conveying line is provided with at least six labeling mechanisms; each three labeling mechanisms are configured into a labeling set controlled by a control unit; and one labeling mechanism in one labeling set is suitable for finishing the same labeling task.
