Abstract (en)
[origin: EP2832655A1] A slide package (10) of the invention includes a rectangular outer box (3) having an opening (18) at a top thereof, and an inner box (2) accommodated in the outer box (3) and slidable upward from the opening (18). The inner box has a top wall (40) closing the opening (18) of the outer box (3) and a lid flap (46) extending downward from the top wall (40). When the inner box (2) is slid upward from the opening (18), an upper part of the inner box (2) is exposed to open the front side of the slide package. The lid flap (46) has a click tab (60) projecting rearward toward an outer rear wall (14) of the outer box (3), and the outer box (3) has an opening (65) with which the click tab (60) can be engaged. The click tab (60) is engaged with the opening (65) and urges the inner box (2) frontward against the outer box (3) while the inner box (2) is accommodated in the outer box (3) with the opening (18) closed with the top wall (40), and disengages from the opening (65) when the inner box (2) is slid upward.
