Abstract (en)

[origin: US2015315919A1] Disclosed is a material on the basis of intermetallic nickel aluminides for applications which require a high high-temperature strength. The material comprises more than 50 at. % nickel and ternary Laves phases. Also disclosed is a component of a turbomachine produced from the material.

Abstract (de)

Die vorliegende Erfindung betrifft einen Werkstoff für Anwendungen, die eine hohe Warmfestigkeit erfordern, auf Basis von intermetallischen Nickelaluminiden, wobei der Werkstoff mehr als 50 at.% Nickel und ternäre Laves - Phasen umfasst, sowie ein daraus hergestelltes Bauteil einer Strömungsmaschine, insbesondere eines Flugzeugtriebwerks.
