Abstract (en)  
The instant application discloses a laundry processing apparatus including a rotary drum (210) configured to store laundry and provided with apertures, a storage tub (200) configured to surround the rotary drum, and a steam supply mechanism (300) configured to supply steam into the rotary drum. The steam supply mechanism supplies the steam into the rotary drum in a spin-dry process to spin-dry the laundry by means of a resultant centrifugal force from rotation of the rotary drum to press the laundry against the rotary drum.
