Abstract (en)
The instant application discloses a laundry processing apparatus including a storage tub (200) configured to store laundry, and a steam supply mechanism (300) configured to supply steam into the storage tub. The steam supply mechanism includes a steam generator (420) with a wall surface defining a chamber for generating the steam, a heater (425) configured to heat the wall surface, a water supply mechanism (437) configured to supply water to the wall surface heated by the heater, a nozzle (352) configured to inject the steam into the storage tub, and a guide pipe (422, 340, 351, 353) configured to guide the steam from the steam generator to the nozzle. The steam injected from the nozzle traverses the storage tub.
