Abstract (en)
[origin: WO2014000985A1] The invention relates to a coach body (200) for a vehicle, in particular a rail vehicle coach body, having at least one attachment element (10) which is provided on the shell (81) of the coach body (200) or forms part of the shell (81) and on which a passenger compartment component of the vehicle is provided. According to the invention, the attachment element (10) has, on the side facing away from the shell (81), at least two attachment sections (20, 30, 40, 50, 60) which are configured differently and which permit different passenger compartment components to be mounted, and two different passenger compartment components are attached to the at least two attachment sections (20, 30, 40, 50, 60) which are configured differently.
