Abstract (en)  
[origin: WO2013163914A1] A spinning machine for the production of synthetic yarns, which has at least one spinning device (1), one godet device (2), one winder device (3) and one control device (4). The control device (4) possesses a main control unit(20) for controlling and monitoring a plurality of drives (5.1,7.1,10.3, 11.1,12.1,14.1,15.1) distributed to the spinning device(1), the godet device(2) and the winder device (3), the drives (14.1,15.1) of the winder device (3) being preceded by a winder control unit (21). In order to obtain as short control times as possible during the variation of operating states, at least one of the drives (7.1) of the spinning device (1) is coupled directly or indirectly to the main control unit (20) via the winder control unit (21).
