Abstract (en)
[origin: WO2013149603A1] The invention relates to a covered garage comprising a protective cover (1) in which a parking area is formed for at least one vehicle, comprising a fixing device (8) which is connected to the protective cover (1) and which is suitable for securing the protective cover (1) on a garage installation surface, comprising an end-face protective cover opening (2) with which a closable entrance and exit hatchway is provided, and comprising a lateral protective cover opening (3) which is closed by at least one door element (5) such that the lateral protective cover opening (3) can be variably adjusted with respect to a horizontal opening width by displacing the at least one door element (5) in order to release a lateral entrance of a vehicle parked in the parking area.
