Abstract (en)

[origin: WO2013150146A1] The invention relates to a pump (1) with a pump housing (3) having a suction opening (4) and an outflow opening (5) and containing at least one conveying means such as a blade or an impeller, in particular for a toy device such as a toy sprinkler or a toy fountain, for conveying liquid or gas through a line (2), in particular a pipe line, not belonging to the pump (1). The pump is characterized in that the pump housing (3) is designed and intended to be inserted completely into the line (2), particularly the pipe line, and to be fixed, preferably detachably, in the line (2) in a usage position.
