Abstract (en)

[origin: DE102012006895B3] The control surface-stabilized full caliber-practice projectile (1) has a solid head portion (3) and an annular control surface body (5) that is adjoined to the rear side of the head part, where the practice projectile is circumferentially provided with a sealing system. The annular control surface body has a conically tapered guide ring (8). The sealing system is arranged in the area of the head part of the practice projectile.
