Abstract (en)

[origin: WO2013151487A1] The present invention relates to a notification device for a toilet space comprising a notification member adapted to be mounted on or in the vicinity of a door to the toilet space, an activation member for activation of said notification member, and a connecting means adapted to transfer an activation signal from the activation member to the notification member. The activation member is adapted to activate the notification member, when a user exits the toilet space, to generate a notification signal during a specified time period from activation. The notification device can further comprise an occupancy sensor adapted to detect the presence of a person in the toilet space.
