Abstract (en)

A method for providing a padded lining (10), particularly for crash helmets (21), and a padded lining (10) obtained by means of the method. The method comprises the high-frequency heat-sealing, in a mold (13), of a sheet of plastic material (11) with fabric (17) at unpadded regions (16) interleaved with padded regions (20), wherein padding elements (14) are interposed between the sheet of plastic (11) and the fabric (17).
