Abstract (en)  
Disclosed is a hopper for a medicine wrapper. A first unit is provided at a hopper body so that the hopper body can be detachably coupled with a body, and at least one second unit is detachably provided along both lateral-side edges of the hopper body to bisect the hopper body or to integrally couple the bisected parts of the hopper body with each other. The assembling work is simple, and the maintenance work such as a cleaning work or a washing work can be easily performed.
