Abstract (en)

[origin: CN104340426A] The present invention discloses a contraction by means of a gaseous medium for defining a space in (2) Inner article (10) and / or article (10) method and apparatus of the shrink material composition. Gaseous medium, the thermal energy is provided by contraction of the at least one internal combustion engine (30) of the waste heat and / or additionally at least one electrical heater run (5, 5 ') of the thermal energy. At least one internal combustion engine (30), respectively, the output driver for converting mechanical power into electrical power to run at least partially at least one additional electric heater (5,5 ') of the at least one transducer (13).
