Abstract (en)

[origin: CN104344418A] The invention relates to a covering device (13) for covering a radial opening (10, 11) in a gas supply line (8) for a gas burner (1), with a clamping portion (14) which is designed at least partially to surround the gas feed line (8) and cover the radial opening (10, 11) and an operating portion disposed on the clamping portion (14) for operating a covering device (13) when the covering device (13) is pushed to the gas supply line (8) at the radial direction.
