Abstract (en)

[origin: WO2013154488A1] The invention relates to a means and a device, respectively, for preventive decontamination of bedbugs and other undesirable arthropods (20) in goods (21). The goods (21) are enclosed in an enclosing, thermally insulated space (22). Hot air (23) is allowed to have an effect in said space (22) and the hot air (23) is circulated in the space (22), whereby the goods (21) are treated with suitable temperature for the time required.
