Abstract (en)
[origin: WO2013152945A1] The invention relates to a restaurant system (1) which comprises at least one working area (2) for cooking and/or preparing food and/or drinks and at least one guest area (3). The working area (2) and the guest area (3) are connected via a transport system (4) for food and/or drinks, and the transport system (4) is designed to transport food and/or drinks from the working area (2) to the guest area (3). The restaurant system (1) according to the invention is characterized in that the transport system (4) has a first transport section (5) with an accelerating and/or transporting device (7), by means of which the food and/or drinks to be transported are supplied with a kinetic and/or potential energy, and a second transport section (6), which adjoins the first transport section (5) and in which the food and/or drinks are transported by means of the kinetic and/or potential energy supplied in the first transport section (5) at least along some sections.
