Abstract (en)

[origin: WO2013152893A1] The invention relates to a starter and retarder element comprising a hydrodynamic transmission element (5, 5') and a planetary gear set (4). The hydrodynamic transmission element (5, 5') includes at least a first functional wheel (11, 11') and a second functional wheel (12, 12'). The first functional wheel (11, 11') can be blocked on a stationary component (14) by means of a single selector element (15). A starting function or a driving function can be set in which the functional wheels (11, 11'; 12, 12') of the hydrodynamic transmission element (5, 5') respectively act as the pump impeller and turbine wheel of a hydrodynamic starting element, and a retarder function can be set in which the functional wheels (11, 11'; 12, 12') of the hydrodynamic transmission element (5, 5') respectively act as the rotor and stator of a hydrodynamic retarder.
