Abstract (en)

[origin: WO2013153211A1] The invention relates to an LED module (10) which simplifies assembly on an assembly element and is sufficiently protected from contamination. The LED module (10) according to the invention comprises at least one through-hole (15) from a first side (11) of the LED module (10) to an assembly side (12), opposite to the first side (11), of the LED module (10), wherein the through-hole (15) is designed such that a screw (16) can be inserted into the through-hole (15) from the first side (11) to the assembly side (12) of the LED module (10) to attach the LED module (10) to an assembly element. Moreover, the LED module (10) comprises a film (13), which, at least in part, is arranged in an adhesive manner on the first side (11) of the LED module (10). Furthermore, the film (13) has at least one structure (14) which comprises at least one perforation of the film (13) in the region of the at least one through-hole (15) of the LED module (10).
