Abstract (en)

[origin: WO2013149906A2] The invention relates to a multi-part stator (4) for an electrical machine (1), which has a plurality of stator segments (6) having coils (13), which are rigidly connected to each other viewed in the circumferential direction of the stator (4), characterized in that the stator segments (6) are connected to each other in the circumferential direction in an interlocking manner. The invention further relates to an electrical machine.
