Abstract (en)

[origin: WO2013153064A2] Disclosed is a casing (7) for a rotary electric machine (1), comprising the following features: - an inner casing part (10) that is made of a metal or a metal alloy and encloses a stator (3) and a rotor (2) of the rotary electric machine (1); - an outer casing part (14) that is made of plastic and at least partially surrounds the inner casing part (10); - at least one connection point (17) that is located between the inner casing part (10) and the outer casing part (14) and mechanically connects the outer casing part (14) to the inner casing part (10); - the at least one connection point (17) has a first flange (31) on the outer casing part (14) and a second flange (32) on the inner casing part (10).
