Abstract (en)

The invention comprises a system for covering a gap (4) occurring between two adjacent parts of a furniture (1, 2). The system comprises a support element (7) to be positioned to cover the gap (4) occurring between two adjacent parts of a furniture (1, 2). The system also comprises holding means (8) for positioning and holding the support element (7) in the position covering the gap (4). Further the system comprises a furniture cover (3) for the furniture, wherein the support element (7) and the holding means (8) are arranged in between the furniture cover (3) and the furniture parts when the furniture cover (3) is installed on the furniture (1, 2) thereby preventing the furniture cover (3) from being pulled into the gap (4). The invention also includes a method for covering a gap (4) occurring between two adjacent parts of a furniture (1,2).
