Abstract (en)  
[origin: EP2837412A1] A hockey or lacrosse glove (100; 200; 300) comprising a cuff (103; 203; 303) and a hand receiving portion (102; 202; 302) having a palm sheet (106; 206; 306), a dorsal sheet (108; 208; 308) extending longitudinally from a proximal end (108A; 208A; 308A) located adjacent the distal end of the cuff to a distal end (108B; 208B; 308B) that is, in use, located generally above the proximal articulation of each finger, and four finger gussets (104; 204; 304), each finger gusset having a distal end (104D; 204D; 304D) for covering the distal end of the finger. The glove also has at least one protector (116; 216; 316) extending to an end (116B; 216B; 316B) located generally above the distal end of the finger gusset and comprising a single pocket (118; 218; 318) and a padding element (120; 220; 320) contained in the single pocket, the padding element defining at least one flexion zone (122; 222; 322) such that, in use, flexing of the player's hand or finger imparts movement of the padding element.
