Abstract (en)

[origin: EP2837438A1] The present invention relates to a support (1) for depositing and/or moving a coil of metal material, in particular a strip, said support (1) comprising a base (10) and at least one support element (20) associated with a bracket (11) of said base (10) through a pin (12) that allows it to rotate in order to switch: - from a first open condition, wherein the support element (20) is positioned for receiving the coil (2), - to a second closed condition, wherein at least two portions (20A, 20B) of the support element (20) are in contact with the outer surface of the coil (2) positioned on said support element (20), and vice versa. The invention is characterized in that said support (1) comprises a locking system (30) for keeping said at least one support element (20) in said second closed position.
