Abstract (en)

The invention relates to a container (10a) comprising a generally rectangular floor portion (14) and a circumferential wall portion (18) with a generally horizontally extending first edge (22), the floor and wall portions (14, 18) defining an interior space (20), the first edge having an arrangement of vertically protruding portions (30) and vertically recessed portions (34). According to the invention the arrangement of protruding and recessed portions (30, 34) is substantially symmetric with respect to a center point (46) of the first edge (22), and for each protruding portion (30) there is a corresponding recessed portion (34) at a position straight opposite.
