Abstract (en)  
The present invention relates to laundry treatment machine (1) comprising an outer casing (2), a rotatable drum (3) which is arranged in axially rotating manner inside the outer casing (2) and is structured to receive the laundry to be washed and/or dried, a control panel (6) configured to select a main laundry treatment program comprising a prefixed sequence of laundry treatment phases. The control panel (6) comprises: a first input region (7) configured to enable the operator to select a main laundry treatment program among a plurality of selectable prefixed laundry treatment programs; and a second input region (8) configured to enable the operator to select a program-part of the selected laundry treatment program, wherein the program-part comprises at least one laundry treatment phase comprised in a subset of laundry treatment phases of said laundry treatment program; the laundry treatment machine further comprises a control unit (5) configured to control driving of the laundry treatment machine (1) in order to selectively perform only the selected program part of the selected laundry treatment program.
