Abstract (en)

The present invention relates to a laundry washing and drying machine (1) comprising: a logic unit (25) adapted to control the electric/electronic components of the machine (1), a plurality of operating programs of the laundry washing and drying machine (1), each one designed specifically for a prefixed kind of laundry, being stored in the logic unit (25), for any prefixed kind of laundry being so stored a corresponding washing program and a corresponding drying program; a display device (27) adapted for presenting user information; a user input device (28) where control elements (29) are provided for selecting one operating program among the plurality of operating programs stored in the logic unit (25). The input device (28) comprises: a first input device (29I) operable by the user for setting, among said plurality of prefixed operating programs stored in the logic unit (25), an operating program associated to a prefixed kind of laundry; a second input device (29II), different from the first input device, operable by the user to set that one operating program associated to a prefixed kind of laundry and set via the first input device (29I) is one between the washing program and the drying program associated to the prefixed kind of laundry.
