Abstract (en)
[origin: EP2837893A1] The present application relates to a cooking appliance comprising a gasket (16, 52) with at least one longitudinally extending hollow chamber (44, 60) for providing a sealing between a structure surrounding a cooking chamber (8) of the cooking appliance and a corresponding closure member. The gasket (16, 52) comprises two free ends (24, 26). The free ends (24, 26) are connected with each other by an adhesive to form a butt joint (22, 54) and thereby an endless gasket. Within the hollow chamber (44, 60) of the gasket (16) in the area of the butt joint (22, 54) a reinforcement sleeve (28, 56) is arranged.
