Abstract (en)
[origin: WO2013157931A1] The invention provides a feed gripping device (1), as well as an assembly thereof comprising a feed-collecting container(21-1, 21-2, 22) for grabbing feed from one or more piles of feed (12-1, 12-2, 12-3), comprising a frame (2) and a displaceable grab bucket carrier (3) and a vertically displaceable grab bucket (11), a sensor (14, 16, 18) for determining a value of a parameter of the pile of feed, as well as a control unit (26) for controlling the gripping device on the basis of the measured value of the parameter, and arranged to determine and set, on the basis of the measured value of the parameter, a grabbing depth at which the control unit makes the grab bucket grab feed from the pile.
