Abstract (en)

[origin: WO2013156602A1] The invention relates to a safety cannula, in particular for extracorporeal blood treatment, comprising a housing (1) and a puncturing cannula (2) having a ground tip (3), wherein the housing is designed to lie against the skin of a patient during use, and furthermore comprising a safety device, which is suitable for automatically pulling the puncturing cannula back into the housing into a protected position when the housing is removed from the skin.
