Abstract (en)

[origin: WO2013156583A1] The invention relates to a deceleration device (22) for a directly electromechanically actuated planetary gear assembly (P) in a seat adjustment mechanism. According to the invention, the deceleration device (22) is integrated into the structural unit consisting of the planetary gear assembly (P) and the electromechanical actuator therefor. The invention further relates to a method for operating a deceleration device (22) for a directly electromechanically actuated planetary gear assembly (P) in a seat adjustment mechanism.
