Abstract (en)

[origin: WO2013156059A1] A storage magazine (1), which is intended and designed for the interim storage of snus bags between a bag-production apparatus (16) and a transporting means (17), comprises two side walls (2, 3), a rear wall (4) and a front wall (19), and spaced-apart shaft walls (5) running parallel to the side walls (2, 3), wherein the storage magazine (1) has on its side directed towards the transporting means a lower closure element (8) for storing a defined number of snus bags in each shaft (6) and for discharging the defined number of snus bags together to the transporting means (17), and wherein the storage magazine (1) has on the side directed towards the bag-production apparatus an upper closure element (9), which is independent of the lower closure element (8).
