Abstract (en)  
A built-in appliance designed for being embedded in a furniture cabinet (110) having a furniture cabinet door (125) swivelling about an axis, the appliance comprising an appliance cabinet (105) and an appliance door (150) swivelling about an axis parallel to the swivelling axis of the furniture cabinet door (125). A coupling member (210) is provided for mechanically coupling the appliance door (150) to the furniture cabinet door (125) such that opening of the furniture cabinet door (125) causes the appliance door (150) to be opened, and closing of the furniture cabinet door (125) causes the appliance door (150) to close, the coupling member comprising a flexible central portion (401) and a first and a second opposite lateral portions (402, 403) and being configured to be attached to the outside of the appliance door (150) along the first lateral portion (402), and to the inside of the furniture cabinet door (150) along the second lateral portion (403).
