Abstract (en)

[origin: WO2013159897A1] The invention relates to a soap dispenser (1) for installation in a kitchen sink (10) or similar, having an actuation element (26), which can be actuated from the top side (28) of the soap dispenser (1) when the soap dispenser (1) is installed, and upon the actuation of which soap can be removed from a supply tank (34) arranged on the underside (32) of the soap dispenser (1) via a soap line (36), more particularly a riser (60), and an outlet opening (38) in the soap dispenser (1) arranged on the top side (28), characterised in that the soap dispenser (1) has a further actuation element (40) which can be actuated from the top side (28), by means of which actuation element (40), via an associated actuation device which has actuation means (48) extending to the underside (32), a drain seal device (20) of the kitchen sink (10) can be actuated, and a kitchen sink (10) having such a soap dispenser (1).
