Abstract (en)
[origin: WO2013159886A1] The invention relates to a horizontal forging press (1) for massive forming, which comprises a machine frame (2), a forging ram (3), a clamping ram (4), at least one first force transmission device (5), at least one second force transmission device (7) and a multi-part forging tool (9), wherein each force transmission device (5, 7) comprises at least one drive unit (6, 8). The first force transmission device (5) for the forging ram (3) is designed as a stroke-controlled force transmission device (5a) and the second force transmission device (7) for the clamping ram (4) is designed as a stroke-controlled or energy-controlled force transmission device (7b).
