Abstract (en)  
[origin: WO2013160528A1] Forming section A paper or board machine forming section comprising a first wire loop (11) passing over a first breast roll (12) and forming a first single wire section (S1), a first head box (100) for supplying a slice jet on the first wire (11), a first turning roll (13) directing the first wire (11) into a downwards inclined slope after the first single wire forming section (S1), a second wire loop (21) forming a second single wire forming section (S2), a second head box (110) for supplying a slice jet on the second wire (21), a second turning roll (23) for directing the second wire (21) into a downwards inclined slope after the second single wire forming section (S2), a joining roll (24) forming a joining point (J1) to the first web (W1) and to the second web (W2) between the first wire loop (11) and the second wire loop (21), said joining point (J1) being below the horizontal level of the first single wire forming section (S1), the first single wire forming section (S1) and the second single wire forming section (S2) being essentially on the same horizontal level.
