Abstract (en)
[origin: WO2013162451A1] A holding device for holding of an upper frame member (17) of a balcony glazing (9), said balcony glazing (9) being mounted between a lower slab (1) and an upper slab (2) located there above. The holding device (3) comprises an attachment part (5) adapted for attachment of the holding device (3) to the upper slab (2), and an engagement part (6) that is arranged on the attachment part (5) and is displaceable vertically relative to the attachment part (5) between a mounting position in which the engagement part (6) allows mounting of the balcony glazing (9), and an operative position in which the engagement part (6) engages with said upper frame member (17) for holding the balcony glazing (9).
