Abstract (en)

[origin: WO2013148470A1] According to one general aspect, a method may include requesting, from a database and by a program executing on a mobile computing device, at least a portion of a business service context regarding a business service. The method may also include receiving, from the database, an aggregated database result regarding the business service. The aggregated database result may include the requested business service context and wherein the business service context includes information from a plurality of applications. The method may also include displaying, via the mobile computing device, at least a portion of the information included by the business service context.
