Abstract (en)

[origin: WO2013160595A1] Method of access to a local service of a device communicating via a terminal. The invention relates to access to a service according to a method comprising steps of: - access to the service via an access terminal (BC, BNC) by a communicating device (DC); - reading (S1, S3) by the access terminal (BC, BNC) of data of the communicating device (DC), the data being personal data relating to the communicating device (DC) and/or third-party service data; - writing (S7) by the access terminal of the data of the communicating device, the third-party data written being chosen (S6) from among a set of third-party service data, the choice of the third-party data to be written (DBdataacc) by the access terminal (BC, BNC) being dependent on the choosing criteria (CC).
