Abstract (en)
[origin: WO2014154372A1] The invention concerns an electric switching system (10) which is provided with a series circuit consisting of a first circuit breaker/earthing switch (TE1), a power switch (LS) and a second circuit breaker/earthing switch (TE2). Also provided is a switch drive (15) comprising a component which is provided with a first curve track (KB1), which is associated with the first circuit breaker/earthing switch (TE1), and with a second curve track (KB2), which is associated with the second circuit breaker/earthing switch (TE2). The component can be driven by a single drive.
