Abstract (en)

[origin: WO2013160375A2] The invention relates to a photovoltaic solar module comprising at least one photovoltaic cell comprising a first transparent polymer layer surrounding said cell on all or some of its sides and a second transparent polymer layer surrounding said first transparent polymer layer on all or some of its sides, said second transparent polymer layer having a thickness greater than or equal to 0.5 mm and a Shore hardness D greater than that of said first polymer layer.
