Abstract (en)
A shield support structure of a helmet (A), wherein a first guide part (2) and a second guide part (3) are provided to be arranged with a support mechanism (B) extending from a shell (A1) to a shield (1), wherein the support mechanism is provided at a side part of a shell to rotatably support the shield in an open and close direction, and the support mechanism guides open and close operation achieved by rotation of the shield from a fully-closed state to a fully-opened state, wherein the first guide part includes an immovable guide part (20) provided at the shell and a guide rail part (21) provided at the shield so as to engage with the immovable guide part, and the second guide part includes a movable guide part (30) provided at the shield and a support rail part (31) provided at the shell to engage with the movable guide part.
